## PROJECTS

---

- **Music Taste:** A Twitter Clone made with Laravel and Pusher.js for broadcasting activities. The main feature is the drag and drop personalizable wall.
- **GeoAL:** A GeoGuessr clone made with Django and the Google Maps Api, where locations shown are only from Albania.
- **Faculty Webpage:** A rework of my faculty's webpage, submitted as an assignment for my Web Programming course made with pure PHP using the OAuth 2.0 authentication system with Azure Active Directory.
